(54) Title: **ALCOHOL BEVERAGE BAG**

(57) Abstract: A bag suitable for containing an alcohol beverage has two panels (14,16) having adjacently positioned edges forming at least one seam. The seam has a joined seam portion where the adjacently positioned edges (20,22,30,32) of the panels are joined together. The seam also has an open seam portion (24) where the adjacently positioned edges of the panels are not joined together. A bag neck molding (40) extends through the open seam portion of the panels. The bag neck molding is secured in sealing relation with the panels of the bag at the open seam portion. The bag neck molding has at least one valve (47,48) accessible for operation from outside the bag and supporting a spear (50) extending into the bag through which the beverage may pass.
